Summary

Motivated third-year Computer Science student with a strong foundation in programming languages. Demonstrates a passion for problem-solving and algorithms, actively seeking opportunities to apply academic knowledge in practical internship settings. Aiming to contribute effectively while gaining hands-on experience in the tech industry.

Education

Vellore Institute of Technology, BTech in Computer Science Engineering 2023-2027

- CGPA: 8.81

Experience

CodeChef Student Chapter, VIT Chennai Sept 2024 - Present

- Event Management Department Lead (March 2025-Present)

Software Development Intern, Expeed Software Pvt. Ltd., Kochi 2 June - 4 July 2025

- Built **Name Matcher**, a web app using **React** and **Node.js** to compare CSV records using **fuzzy matching** and **name blocking** for efficient similarity detection

Skills

- Programming languages-Python,C,C++ ,Java
- WebDevelopment: React, Node js, Vite, Tailwind CSS
- Machine Learning: Regression, Classification, Clustering, Ensemble Methods, Model Evaluation, Hyperparameter Tuning (Grid/Random Search)
- LangChain (Groq AI integration)

Certifications

Name: Machine Learning

- Issuing Organization: The SmartBridge
- Date Earned: 15 July 2025

Projects

Ongoing Projects

Enhanced Personal Item Security System

- GPS-enabled smart security device with BLE, alarm, and battery alerts.

Completed Projects

1. Weather Based Playlist Generator

- Responsive React app recommending music based on real-time weather using OpenWeatherMap, LangChain + Groq AI, and YouTube API.
- *Tech*: ReactJS, Vite, Tailwind CSS, LangChain, Groq AI, YouTube API

2. Name Matcher

- React, Node.js, Fuzzy Matching, CSV Parsing
- A web application that compares records from two CSV files and calculates **similarity percentages** using **fuzzy string matching** and **name blocking** techniques
- Designed for efficient performance on large datasets by reducing **time complexity** in matching operations
