PROJECTS

- Audio Denoising Using MATLAB** Nov. 2024
Vellore Institute of Technology, Chennai Drive
Implemented an Audio Denoising system in MATLAB to enhance speech clarity by reducing unwanted noise. The project involved adding synthetic noise to an audio signal and applying signal processing techniques to recover a clean version. This approach improves audio quality for applications in speech recognition, telecommunications, and noise reduction systems.
- Online Election System** Nov. 2023
Vellore Institute of Technology, Chennai Drive
Developed a secure and efficient Online Election System using Python and SQL to streamline the voting process. The system enables user authentication, real-time vote casting, and secure database management to prevent fraud. It ensures transparency, accuracy, and accessibility, making elections more efficient and tamper-proof.
