Education

Vellore Institute of Technology, Chennai

Sep. 2023 – Present

Bachelor of Technology in Computer Science and Engineering

CGPA : 8.41

St. Antony Public School, Kanjirappally, Kerala

Mar. 2021 – Mar. 2023

Higher Secondary

Chennai, India

MGM Central Public School, Thiruvananthapuram, Kerala

Mar. 2011 – Mar. 2021

Elementary & High School

Relevant Coursework

- Data Structures
- Algorithms Analysis
- Artificial Intelligence
- Cloud Computing
- Web Programming
- Database Management
- Computer Architecture

Experience

Quadance Technologies Pvt. Ltd.

May 2025 – June 2025

Software Engineer (Full-Stack / ML Applications) Intern

Thiruvananthapuram, Kerala

- Built a full-stack college portal system with Flask, React, and SQLAlchemy, enabling secure access for 2000+ students and faculty.
- Implemented JWT authentication and role-based access control, cutting unauthorized access incidents by > 95%.
- Engineered and optimized data-intensive APIs for student/faculty dashboards, reducing query load time by 40% through pagination and caching.
- Integrated OCR (Tesseract + HuggingFace) for automated document verification, reducing manual entry effort by 60%.

Projects

Emotion Detection System using NLP | Python, Flask

January 2025

- Developed an Emotion Detection System using Flask to analyze and classify emotions from text input.
- Implemented a REST API endpoint that processes user input and returns emotion scores along with the dominant emotion.
- Designed and executed unit tests using unittest to ensure accurate emotion classification.

ItinerEase - AI Travel Planner | HTML, CSS, Javascript, Figma

September 2024

- Designed intuitive and user-centered interfaces for Itinerease, ensuring a seamless and engaging user experience tailored for an AI-powered travel planner.
- Developed the frontend of the platform, implementing responsive and visually appealing designs using modern web development frameworks and tools.
- Created a chatbot-based design interface, enhancing user interaction by providing an intuitive and conversational approach to travel planning.

Automated Obstacle Avoidance Robot | Arduino

December 2023

- Developed a self-navigating robot using Arduino UNO, ultrasonic sensor, servo motor, and DC motors.
- Implemented real-time obstacle detection and avoidance logic with a motor driver shield for smooth movement.
- Designed an efficient power system using a Li-ion battery, ensuring continuous and autonomous operation.

Technical Skills

Languages: Python, Java, C, HTML/CSS, JavaScript, SQL

Developer Tools: VS Code, Docker, Google Cloud Platform

Technologies/Frameworks: Flask, Figma, Kali Linux, React.js

Leadership / Extracurricular

Malayalam Literary Assosiation

March 2025 – Present

Design Lead

VIT Chennai

Artificial Intelligence Club

January 2025 – Present

Technical Team

VIT Chennai

Malayalam Literary Assosiation

September 2024 – March 2025

Executive Committee
