Education

Vellore Institute of Technology, Chennai

Bachelor of Technology in Computer Science and Engineering

Sep. 2023 – Present

CGPA : 8.41

St. Antony Public School, Kanjirappally, Kerala

Higher Secondary

Mar. 2021 – Mar. 2023

Chennai, India

MGM Central Public School, Thiruvananthapuram, Kerala

Elementary & High School

Mar. 2011 – Mar. 2021

Relevant Coursework

- Data Structures
- Algorithms Analysis
- Artificial Intelligence
- Cloud Computing
- Web Programming
- Database Management
- Computer Architecture
- Computer Networks

Experience

Quadance Technologies Pvt. Ltd.

Software Engineer (Full-Stack / ML Applications) Intern

May 2025 – June 2025

Thiruvananthapuram, Kerala

- Built a full-stack college portal system with Flask, React, and SQLAlchemy, enabling secure access for 2000+ students and faculty.
- Implemented JWT authentication and role-based access control, cutting unauthorized access incidents by > 95%.
- Optimized network traffic and API performance through pagination, caching, and Docker deployments on GCP, improving response times by ~ 40%.
- Integrated OCR (Tesseract + HuggingFace) for document verification and gained exposure to virtual networks, firewall rules, and IAM roles while configuring cloud resources.

Projects

Food Distribution Platform on GCP | React.js, Flask, Google Cloud Platform

April 2025

- Designed and implemented a web platform connecting restaurants and NGOs for surplus food distribution, hosted on Google Cloud Platform.
- Built RESTful APIs in Flask and deployed them on GCP App Engine; integrated Cloud SQL for secure storage and retrieval of food inventory data.
- Configured VPC, firewall rules, and IAM roles to enable safe access to backend services and protect user data.

Emotion Detection System using NLP | Python, Flask

January 2025

- Developed an Emotion Detection System using Flask to analyze and classify emotions from text input.
- Implemented a REST API endpoint that processes user input and returns emotion scores along with the dominant emotion.
- Designed and executed unit tests using unittest to ensure accurate emotion classification.

ItinerEase – AI Travel Planner | HTML, CSS, JavaScript, Figma

September 2024

- Designed clean, user-focused UIs for an AI-based travel planner, ensuring seamless interaction.
- Built responsive frontend with modern web frameworks and reusable components.
- Created a chatbot-style interface to simplify trip planning and improve engagement.

Technical Skills

Languages: Python, Java, C, JavaScript, SQL, Bash/PowerShell

Cloud Platforms: Google Cloud Platform

Networking: TCP/IP, Subnetting, Routing, DNS, VPN, Load Balancers, Firewalls

Developer Tools: VS Code, Docker, Git

Frameworks/Technologies: Flask, React.js, Figma, Kali Linux

Leadership / Extracurricular

Malayalam Literary Association

Design Lead

March 2025 – Present

VIT Chennai

Artificial Intelligence Club
